## Renal Health:

Moderate amount of high quality protein to support the unique nutritional requirements of cats with early-stage chronic kidney disease

Restricted phosphorus to help nutritionally manage cats with chronic kidney disease

- Contains EPA, an omega-3 fatty acid, to help reduce inflammatory mediators
- Controlled sodium
- Added B-complex vitamins and potassium to help compensate for loss secondary to polyuria
- Formulated to be non-acidifying
- Energy-dense for needed calories

## General Health:

- Highly digestible formula to promote optimal nutrient absorption
- Because calcium oxalate crystals are more prevalent in older cats<sup>5</sup>, this diet promotes a urinary environment unfavorable to the development of calcium oxalate crystals
- Contains antioxidant vitamins A and E to support a healthy immune system, including a high level of vitamin E to help reduce oxidative stress

†Based on digestion testing conducted at the Purina PetCare Technology Centers

1 Adjustments must be made for environmental conditions, activity level, and body condition. Provide fresh water in a clean container daily.

2 Kilocalories of metabolizable energy (ME).

3 This daily amount should be divided into several small meals throughout the day.

4 For each additional pound of body weight, feed an additional 24 kilocalories.
